

Jonathan Emanuel Lagos Pino

Santiago, Chile | jonathan.lagosp@tuta.io | (+56) 9 5114 7904 | linkedin.com/in/jonathan-lagos-pino | Portfolio : github.com/Jona-LP

PROFESSIONAL PROFILE

Data Analyst with a strong mathematical background and over 4 years of experience automating and optimizing operations within Decathlon's Customer Experience department. Developed dashboards and automated workflows that eliminated repetitive tasks and enhanced data-driven decision-making. Led Python training sessions achieving an 80%+ pass rate. Proficient in SQL, Tableau, and Google Sheets. Seeking a role as a Business or Data Analyst.

SKILLS

Programming Languages & tools: Python (Pandas, NumPy, Matplotlib) · SQL · Excel · Google Sheets · Tableau · Looker Studio · Google Colab

Professional Competencies: Data Analysis & Visualization · Process Automation · Analytical Thinking · Data Storytelling & Communication · Cross-Functional Collaboration

Languages: Spanish (Native) · English (B2, currently preparing for IELTS certification)

WORK EXPERIENCE

Teaching Assistant | Pontificia Universidad Católica de Valparaíso, Valparaíso, Chile Aug. 2025 – Nov. 2025

- Organized weekly Python practices for undergraduate students of Mathematics and Mathematics Education, resulting in passing of more than 80% of students in the designated module.
- Created interesting exercises that made connections between mathematical theories and their applications in Python, thus minimizing the complexity of learning Python.

Private Mathematics Tutor | Freelance, Online Jun. 2024 – Oct. 2025

- Provided university and college students with tutoring in calculus, algebra, and statistics examinations.
- Taught high school students how to prepare for the 2025 PAES examination (College Entrance Exam in Chile) in order to gain entry into higher learning institutions.

Customer Experience | Decathlon, Viña del Mar, Chile Dec. 2020 – Aug. 2025

- Process automation of repetitive tasks using Google Sheets and Looker Studio, which save the team many hours each week and free up time to focus more on customer-centric services.
- Created Looker dashboards that track KPIs related to Customer Experience, helping make decisions driven by data.

PROJECTS

Books Dataset: Data Cleaning Workflow

- Created a data preprocessing script to handle a dataset with 50,000+ rows containing books, involving tasks like dealing with missing values, formatting, and EDA.
- Output: Processed CSV file dataset ready for visualization. Tools used: Python, Pandas.

EDUCATION AND CERTIFICATIONS

Data Analysis Bootcamp Dec. 2024 - Present

Desafío Latam

SQL · Python (Pandas, NumPy, Matplotlib) · Descriptive Statistics · Tableau

BSc. in Mathematics Mar. 2019 - Dec. 2025

Pontificia Universidad Católica de Valparaíso

Programming · Multivariable Calculus · Numerical Linear Algebra · Probability · Numerical Analysis · Deep Learning

BA. in Philosophy Mar. 2011 - Jan. 2015

Universidad de Chile

Propositional Logic · Formal Logic · Epistemology · Ethics
